DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 9 and 29 neither disclose nor render obvious a disc-braking device having all the limitations claimed in combination and specifically including:

A tappet installed on the structure portion and utilized for driving the braking rod;

An elastic component installed on the structure portion, wherein one end of the elastic component hooks the tappet;

An elastic unit installed on the structure portion and utilized for driving the braking rod to force the disc to stop rotating.

Claim 29 further recites the specific limitation:

An elastic unit installed on the structure portion and utilized for driving the braking rod to force the disc to stop rotating when the elastic unit is moving.

Tanaka (US Patent Number 4799122) is the closest prior art of record and does not teach these features.

2. These features in combination with the other features of the other claims are not taught in any prior art of record.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
